Alina Kolomenska

Full-Stack Engineer

Kyiv, Ukraine alina.kolomenska@gmail.com linkedin.com/in/alina-kolomenska github.com/alina-kolomenska

SUMMARY

Full-stack engineer with a strong frontend focus and 5+ years building production SaaS products and brand websites for healthcare, legaltech, and e-commerce clients. Works mainly with React, Next.js, and TypeScript, backed by Node.js and NestJS. Delivered complex systems, from real-time messaging and multi-tenant platforms to AI-driven user flows with voice and avatar agents, and real-time speech translation. Professional working English, with experience on international, distributed teams. Open to frontend and full-stack roles, fully remote.

SKILLS

Frontend	JavaScript (ES6+), TypeScript, React, Next.js, HTML5, CSS3, Sass, Redux Toolkit, TanStack Query, React Hook Form, Zod, Tailwind CSS, shadcn/ui, Material UI, Storybook, Framer Motion, GSAP, Lottie, i18n, Recharts, Vite, Webpack
Backend and auth	Node.js, Express, NestJS, REST APIs, Clerk, OAuth, JWT, role-based access control (RBAC)
Data	PostgreSQL, Prisma ORM, MySQL, Flyway, MongoDB, Firebase, Neon
Testing	Jest, React Testing Library, Playwright, Cypress, BrowserStack
Delivery and monitoring	CI/CD, Docker, Vercel, Render, Cloudflare, Bugsnag
Integrations and AI	Twilio, Google Maps API, Storyblok, Postmark, Slack API, Vapi, ElevenLabs, HeyGen, Tavus, Soniox, Claude API, OpenAI API, Gemini API, LLM-based translation
AI development tools	Claude Code, OpenAI Codex, Cursor, GitHub Copilot

EXPERIENCE

Full-Stack Engineer · Incode Group — Dec 2025 – Present
Kharkiv, Ukraine · Remote

- Own features end to end within client product teams, from React and Next.js interfaces to NestJS services, databases, and deployment.
- Design and ship REST APIs with Node.js, Express, and NestJS, and model data in PostgreSQL (Prisma) and MySQL (Flyway migrations).
- Build production frontends with React, Next.js, and TypeScript, styled with Tailwind CSS and shadcn/ui.
- Implement authentication and role-based access control with Clerk and JWT.
- Integrate AI voice and avatar agents (Vapi, ElevenLabs, HeyGen, Tavus) into production assistant and automation features, alongside Twilio telehealth calling.
- Run parallel Claude Code sessions in separate git worktrees to develop several features at once, reviewing and testing every change before merge.
- Deploy and maintain apps through CI/CD pipelines, using Docker for local backend environments.

Frontend Developer · Incode Group — Jul 2022 – Dec 2025
Kharkiv, Ukraine · Remote

- Built production web applications and brand websites for healthcare, e-commerce, and enterprise clients, working within their product teams alongside designers and backend engineers from design handoff to release.
- Developed dashboards, admin panels, scheduling, and live chat features with React and TypeScript, styled with Material UI, Tailwind CSS, shadcn/ui, and Sass.

- Built animated interfaces and micro-interactions with Framer Motion, GSAP, and Lottie, keeping performance smooth across devices.
- Created and maintained shared Storybook component libraries used across projects.
- Integrated headless CMS and e-commerce platforms, added analytics tracking, and optimized Core Web Vitals on brand and marketing websites.

Full-Stack Developer · Inetex LTD — Mar 2021 – Jul 2022
Rehovot, Israel · Hybrid

- Built the React and TypeScript frontend of a client's real estate marketplace for rentals and home sales, plus REST endpoints in the Java Spring backend with MongoDB.
- Built responsive map and search interfaces with the Google Maps API for desktop and mobile.
- Created a shared component library used across company products.
- Wrote React Testing Library and JUnit tests, refactored legacy code, and fixed bugs.

EDUCATION

Tel-Ran Educational Center · Rehovot, Israel — Sep 2020 – Sep 2021
Full Stack Development course

Kyiv Electromechanical College · Kyiv, Ukraine — Sep 2014 – Jun 2017
Administration of Computer Systems and Networks, Junior Specialist's diploma with honours

LANGUAGES

Ukrainian (native) · English (professional working) · Hebrew (limited working)

PROJECTS

Quadrant Health Web App & Marketing Website — Feb 2023 – Sep 2026
Incode Group · app.quadrant.health · quadrant.health

An enterprise AI healthcare platform for patient management, clinical analytics, interactive voice/video automation, and secure healthcare messaging. Founding frontend engineer who built the primary web app from scratch, launched the public marketing website, and supported backend feature delivery.

The platform grew from a prototype into a product handling 2M+ patient interactions annually, with 70%+ of calls resolved without staff involvement (company-reported), serving clients in the US and Europe.

- Architected the core React web app with Webpack, setting up state management, routing, and a scalable UI structure.
- Implemented RBAC and feature gating for route and module access across clinical teams.
- Built real-time patient messaging and in-browser Twilio telehealth calling, plus AI assistant interfaces with switchable voice and avatar providers (Vapi, ElevenLabs, HeyGen, Tavus).
- Developed appointment calendars, clinical analytics dashboards, and PDF/e-signature tools.
- Built live doctor-patient speech translation with Soniox, and multi-language support with i18n and LLM translation for dynamic content.
- Supported PHP backend API endpoints and Flyway migrations for the MySQL database, and used Docker for local development.
- Optimized Core Web Vitals for the web app and the Vite marketing website, and handled the website's SEO, analytics tracking, and Termly cookie consent.
- Connected the website's demo request and subscription forms to Postmark emails and Slack notifications for the team.
- Set up automated quality pipelines with Playwright, Cypress, Jest, Storybook, and Bugsnag.

Technologies: React, Vite, Webpack, TypeScript, Redux Toolkit, React Hook Form, Zod, Tailwind CSS, Material UI, shadcn/ui, Storybook, Framer Motion, Recharts, i18n, MySQL, Flyway, Twilio, Vapi, ElevenLabs, HeyGen, Tavus, Soniox, Postmark, Slack API, Jest, Playwright, Cypress, BrowserStack, Vercel

Injuro Web App & Marketing Website

Dec 2025 – Oct 2026

Incode Group · app.injuro.com · injuro.com

An AI-powered legaltech platform that automates personal injury client intake and attorney workflows. Part of a small engineering team building the public marketing website and the authenticated web app for clients, admins, and providers, with real-time AI voice intake agents.

- Contributed to the development and architecture of the authenticated web app and the marketing website, both built with Next.js (App Router) and TypeScript.
- Implemented authentication and role-based access control with Clerk and Next.js middleware.
- Built custom Next.js API routes for server-side authorization checks and secure API key proxying.
- Integrated Vapi and ElevenLabs voice widgets for real-time legal intake, managing asynchronous agent state and data fetching with TanStack Query and validating API boundaries with Zod.
- Built NestJS services with PostgreSQL and Prisma for medical check-ins, turning Vapi voice-call summaries into a secure, per-user recovery history.
- Added multi-language support to the web app with i18n.
- Delivered accessible marketing landing pages with generated sitemap routes, optimized for performance and SEO.

Technologies: Next.js, React, TypeScript, Tailwind CSS, shadcn/ui, Framer Motion, TanStack Query, React Hook Form, Zod, Node.js, NestJS, PostgreSQL, Prisma ORM, Clerk, Vapi, ElevenLabs, i18n, Vercel

Treasury Wine Estates Brand Websites

Aug 2022 – Jan 2023

Incode Group · tweglobal.com/brands · hideandseek.digital/work/twe

A suite of high-performance websites and landing pages for major Australian wine brands, built in collaboration with the digital agency Hide & Seek. The project focused on a scalable, white-label frontend with reusable UI components, client-side headless CMS integration, and GSAP animations.

- Converted Figma designs into responsive interfaces for multiple wine brands.
- Developed and maintained a shared Storybook component library for rapid UI reuse across brand sites, backed by React Testing Library component tests.
- Integrated Storyblok headless CMS on the client side so non-technical teams can manage content and page layouts.
- Built scroll-driven GSAP animations and interactive hero transitions.
- Optimized frontend performance, asset loading, and cross-browser compatibility.

Technologies: React, TypeScript, Redux, GSAP, Storybook, React Testing Library, Storyblok, Figma

Map-Based Real Estate Marketplace

Mar 2021 – Jul 2022

Inetex LTD

A marketplace that connects renters with landlords and homebuyers with sellers, built around interactive map views and multi-criteria apartment search on mobile and desktop.

- Built a responsive React web application with reusable layout templates and dark mode, optimized for mobile and desktop in portrait and landscape orientations.
- Created interactive map views with property markers using the Google Maps API.
- Developed multi-criteria apartment search with combinable filters for price, location, property type, and amenities.
- Built REST endpoints in the Java Spring backend, worked on the MongoDB data model, and added OAuth-based user authentication.
- Covered the frontend with React Testing Library tests and the Java backend with JUnit tests, which supported safe refactoring and bug fixes.

Technologies: React, TypeScript, Redux, Webpack, Bootstrap, React Testing Library, Java (Spring), MongoDB, JUnit, Google Maps API, OAuth
